

Oke Precious Abioye

FULL-STACK WEB DEVELOPER

Ogbomosho, Oyo State, Nigeria | okepreciousab@gmail.com | +2348101238416

github.com/Oke-Precious

Professional Summary

Computer Science student and junior full-stack developer with hands-on project experience in React, JavaScript, Node.js and MongoDB. Stronger in frontend development, with growing backend capabilities demonstrated through REST APIs, authentication and database-backed applications. Use AI-assisted development tools to streamline routine work and dedicate more time to critical thinking and problem-solving. Seeking junior developer roles and software development internships, including remote opportunities.

Technical Skills

Languages and frontend: HTML5, CSS3, JavaScript, React, Bootstrap, Tailwind CSS

UI implementation: Responsive design, Flexbox, CSS Grid, media queries, animations and transitions

Backend and databases: Node.js, Express, MongoDB, Mongoose, Firebase, REST APIs, JWT

Tools and deployment: Git, GitHub, npm, VS Code, Postman, Netlify, Vercel

Design: Figma, Canva, Photoshop, CorelDRAW

Selected Technical Projects

Gavel Case Tracker | React, Node.js, Express, MongoDB

Frontend repository | Backend repository

- Built case-list interfaces with search, filters, pagination and reusable React components; connected views to REST endpoints using Axios.
- Implemented backend case CRUD, Mongoose data models, status-history records and role-based route permissions, with JWT authentication.
- Added frontend session restoration and token-refresh handling, plus backend CSV import and CSV/PDF export endpoints.

Projexa Project Management Prototype | HTML, CSS, JavaScript, Node.js

github.com/Oke-Precious/Projexa

- Created a project dashboard with task-detail modals, editable task fields and project-creation forms.
- Implemented a Node.js backend with signup/login endpoints, password hashing, JWT issuance and project storage using sql.js; published the frontend on Netlify.

Special Bank Frontend Demo | HTML, CSS, JavaScript, Bootstrap

specialbank.netlify.app

- Built a banking interface with account screens, simulated transfers, transaction history and printable receipts.
- Used browser localStorage to retain demo account and transaction data, with client-side input checks; deployed on Netlify.

Atmos Weather App | HTML, CSS, JavaScript, OpenWeather API

specialweather.netlify.app

- Integrated city search and browser geolocation with asynchronous API requests to display weather conditions, temperature, humidity and wind speed.
- Added loading and API-error states, Celsius conversion and responsive Grid/Flexbox layouts with mobile breakpoints; deployed on Netlify.

Education

Ladoke Akintola University of Technology (LAUTECH), Nigeria

Computer Science | Undergraduate studies in progress

Relevant coursework: Data Structures and Algorithms, Database Management, Software Engineering, Systems Analysis and Design, Human-Computer Interaction.
